

Accountancy is a profession that provides services to individuals and businesses. It involves the preparation and analysis of financial statements, and the provision of financial advice. Accountants are responsible for ensuring that financial records are accurate and up-to-date, and for providing a clear and concise summary of the financial position of their clients. They also play a key role in the management of a business, and in the development of financial strategies. Accountants are highly skilled professionals who are essential to the success of any organization.

Which of the following is NOT a function of accountancy?

- A. To provide financial advice
- B. To prepare financial statements
