

CENTER FOR EXCELLENCE in the
NEUROSCIENCES

SEMINAR SERIES

Huntington's Disease, Cannabis, and All the Pharmacology in Between

Eileen Dawson, Ph.D.
Professor, Associate Dean of Graduate Studies
Dalhousie University

Robert Blaylock, M.Sc., Ph.D.
Department of Pharmacology
Dalhousie University

Thursday, June 16, 2015
12:00-1:00 p.m.

Alfond 304
Biddeford Campus

Lunch will be Provided

Hosted by: John Streicher, Ph.D.

Sponsored by: The UNECOM Biomedical Sciences Department
and the Center for Excellence in the Neurosciences

at Dalhousie University. Eileen's current research interests include the pharmacology of cannabinoids, dopamine, and endothelin, transcriptional regulation, and Huntington's disease. She is currently a member of multiple professional research societies, including the Canadian Society for Neuroscience and an executive board member of the Canadian Council on Animal Care. Eileen obtained her BSc Hon in Biology and PhD from Dalhousie

Robert Blaylock is a PhD student in the Department of Pharmacology at Dalhousie University. He has published 13 manuscripts in peer-reviewed journals, 24 conference abstracts, and 3 patents. Robert's current research focuses on applying the pharmacological principals of biased agonism and allosteric modulation to the development of novel cannabinoid-based therapeutics. He is the student representative for the International Cannabinoid Research Society and the American Society for Pharmacology and Experimental Therapeutics - Neuropharmacology Division. Robert obtained his BSc Hon in Biochemistry from the University of Saskatchewan and his MSc in Pharmacology and Neuroscience from Dalhousie University.
